DE WOOD STOK

About
DE WOODSTOK

Founded in 2012 by three Dutch climbers, deWoodstok began with a drive to innovate bouldering equipment. What started as a small idea grew into a company that transformed makeshift brushes – even used at world cups – into high-quality gear. In 2013, we became pioneers with **the first bouldering brush on the market that was adjustable in angle** for better access. We continue to innovate by enhancing our products and refining our production processes, ensuring that our gear remains reasonably priced. Our **commitment to sustainability** includes using FSC-certified wood, bamboo, and local production. We **prioritize social responsibility** by producing our products in a local sheltered workshop, supporting people with disabilities.
At deWoodstok, you can expect **exceptional service and affordable, premium products**, all while contributing to a positive impact on our environment and the climbing community.

Extendable bouldering brush - indoor

Sturdy brush for gyms and competitions

deWoodstok's *Extendable bouldering brush - indoor* is the ideal solution for efficiently cleaning holds in bouldering gyms and at competitions. Its telescopic stick makes it suitable for brushing holds at any height. For many years, this product has proven itself in over a thousand bouldering gyms worldwide.

Features

- Sturdy design, suitable for intensive use in bouldering gyms
- Length-adjustable stick, long enough for 4.5m high bouldering walls (legal max)
- Easy & quick angle adjustment for brushing holds in various positions
- Two brushes included: small and big brush for cleaning slopers, crimps, and pockets
- Flexible setup: both sides can hold any of four available brush types
- Premium boar hair brushes backed by extensive bristle research
- Replaceable brushes with affordable 20-packs available
- Double the lifespan of the big brush by mounting it in reverse once one side is worn out
- Discounts available for orders of 5 or more pieces

Comparison to our Wooden bouldering brush indoor

The Extendable Bouldering Brush Indoor is quickly and easily adjustable in length, offering one convenient solution for cleaning holds both close by and high up. The telescopic stick is sturdy and designed to

withstand intensive indoor use. Its wooden counterpart, however, is even more robust. They each have a distinct look and feel. The extendable version is slightly longer than the wooden one (2.60 m vs 2.25 m).

Worldwide Shipping
We ship our brushes to gyms around the globe. However, shipping the pole outside of Europe can be costly. That's why we designed our brush head to fit standard telescopic poles with a 3/4″-5 threaded top, which are commonly available in the US, Canada, Australia. and many more countries. If you are an overseas customer, you may want to order only our brush heads and use a locally available (telescopic) pole.

The Extendable bouldering brush indoor includes
- Extendable stick indoor
- Brush head with big and small brush

Specifications
- SIZE: 1550-2600mm Length
- WEIGHT: 1170 grams
- MATERIAL:
    - Stick: Aluminum & Glass Fiber Reinforced Nylon
    - Brush Head: Beech Plywood & Aluminum
    - Brushes: Beech wood & Boar Hair

SKU: DWS-17

Wooden bouldering brush - indoor L

Extremely sturdy brush for gyms

deWoodstok's *Wooden bouldering brush - indoor L* is the ideal choice for bouldering gyms seeking the most durable brush. This wooden stick is virtually unbreakable, stands out in look and feel, and is an environmentally friendly choice. It is available in two lengths (L & M), suitable for cleaning holds both close by and high up.

Features
- Extremely robust design with no moving mechanical parts
- Cohesive look: the stick, head, and brushes are all made of beech wood
- Sustainable: made from FSC-certified beech wood, locally sourced in Germany
- Long enough to comfortably reach most holds
- Easy & quick angle adjustment for brushing holds in various positions
- Two brushes included: small and big brush for cleaning slopers, crimps, and pockets
- Flexible setup: both sides can hold any of four available brush types
- Premium boar hair brushes backed by extensive bristle research
- Replaceable brushes with affordable 20-packs available
- Double the lifespan of the big brush by mounting it in reverse once one side is worn out
- Discounts available for orders of 5 or more pieces

Comparison to our Extendable bouldering brush indoor
The Wooden Bouldering Brush Indoor is extremely robust, since it has no moving mechanical parts. While it has a slightly shorter reach than the telescopic version (2.25 m vs 2.60 m), it can still comfortably access most holds. Only very high holds (4–4.5 m) may require stretching or holding the stick overhead with one hand. Gyms often use the shorter M edition alongside the L edition for more convenient access to lower holds.
Although shipping may be more expensive due to its size, the Wooden Bouldering Brush is a one-time investment, built to last for years of heavy use.

Worldwide Shipping
We ship our brushes to gyms around the globe. However, shipping the pole outside of Europe can be costly. That's why we designed our brush head to fit standard telescopic poles with a 3/4″-5 threaded top, which are commonly available in the US, Canada, Australia. and many more countries. If you are an overseas customer, you may want to order only our brush heads and use a locally available (telescopic) pole.

The Wooden bouldering brush indoor L includes
- Wooden stick indoor L
- Brush head with big and small brush

Specifications
- SIZE: 2250mm Length
- WEIGHT: 1230 grams
- MATERIAL:
    - Stick: Beech wood & Aluminum
    - Brush Head: Beech Plywood & Aluminum
    - Brushes: Beech wood & Boar hair

SKU: DWS-21

Wooden bouldering brush - indoor M

Extremely sturdy brush for gyms - short

deWoodstok's *Wooden bouldering brush - indoor M* is the ideal choice for bouldering gyms seeking the most durable brush. This wooden stick is virtually unbreakable, stands out in look and feel, and is an environmentally friendly choice. It is available in two lengths (L & M), suitable for cleaning holds both close by and high up. Gyms often use the shorter M edition alongside the L edition for more convenient access to lower holds.

Features

brushes

SKU: DWS-20

Small brush

Replacement brush for brush head

deWoodstok's small brush is perfect for both bouldering and rock climbing, whether indoors or outdoors. Specifically designed to fit deWoodstok's brush head, this brush can also be conveniently used as a hand brush in your chalk bag. Featuring a compact surface area of boar hair bristles, it excels at cleaning crimps and pockets that are hard to reach with larger brushes. Despite its size, this brush is sturdy enough to withstand the pressure needed for effective cleaning without breaking, and its performance and durability have proven themselves over the years.
Mounted on our brush head or stowed away in your boulder bag, this brush is an indispensable companion for your gym sessions or your next bouldering adventure!

Fits all current and discontinued versions of the brush head.

Specifications

- SIZE: 180 x 19 x 22 mm
- WEIGHT: 20 grams
- MATERIAL: Beech wood & Boar Hair

SKU: DWS-03

Big Brush

Replacement brush for brush head

deWoodstok's big brush is specially developed for cleaning larger boulder holds, both indoors and outdoors. Designed to fit on deWoodstok's brush head, this brush features an optimal surface area of premium boar hair bristles, allowing you to apply sufficient pressure while providing ample cleaning coverage for slopers, wall surfaces, and elements. Its sturdy design ensures it can withstand intensive use, and its performance and durability have been reliably demonstrated over the years. The big

brush has a symmetrical layout, enabling you to double its lifespan by mounting it in reverse once one side is worn out. Whether you're at the gym or out in Fontainebleau, this brush will help you send your project!

Fits all current and discontinued versions of the brush head.

Specifications

- SIZE: 106 x 43 x 36mm
- WEIGHT: 72 grams
- MATERIAL: Beech wood & Boar Hair

SKU: DWS-16

Sloper brush

Replacement brush for brush head

The Sloper Brush is an extra-large replacement brush that fits onto the brush head and is designed to quickly and efficiently clean very big slopers and volumes. With a size twice as big as our big brush, it makes brushing large surfaces much easier. It's also ideally suited for competitions where fast cleaning of extensive areas is essential.
The Sloper Brush's lifespan can be doubled by mounting it in reverse once one side wears out—just like the big brush.

Specifications

- SIZE: 160 x 56 x 36 mm
- WEIGHT: 160 grams
- MATERIAL: Beech wood & Boar Hair

SKU: DWS-05

Bigger Hand Brush

Hand brush/ Replacement for brush head

deWoodstok's bigger hand brush is designed for brushing slopers, crimps or elements up to your eye level. This brush is ideal for cleaning boulders, both indoors and outdoors, suitable for both private and commercial applications. The Bigger hand brush can also be mounted on our brush head.

The bigger hand brush has undergone extensive testing to optimize the type, density, and length of the boar hair bristles, ensuring exceptional cleaning performance and durability. Its sturdy beech wood handle is built to withstand pressure, so it won't break while effectively cleaning holds.

Compact and easy to store in your boulder bag, this bouldering brush is an essential companion for the gym or for your next bouldering adventure!

For gym owners:
This item can be customized with a logo engraving of your bouldering gym. Contact us for more details!

Specifications

- SIZE: 250 x 30 x 26 mm
- WEIGHT: 66 grams
- MATERIAL: Beech wood & Boar Hair

DE WOODSTOK

sticks

SKU: DWS-11

Extendable stick indoor

Replacement stick

deWoodstok's Extendable stick indoor is built for intense commercial use in bouldering gyms and competitions. This sturdy telescopic stick features a button for quick and easy height adjustment. It extends from 135 cm to 240 cm (without the brush head), ensuring you can comfortably reach climbing holds up to 4.5 m high, the legal maximum height for indoor bouldering. With its 3/4″-5 threaded top, it connects directly to deWoodstok's Brush head.

DE WOODSTOK

brush head

SKU: DWS-19

Brush head

Brush head without stick

deWoodstok's Brush Head is part of all our (extendable) bouldering brushes, but can also be ordered separately. It features a solid aluminum core that connects directly to any of our sticks or to any

standard pole with a 3/4″-5 threaded top, commonly available in the US, Canada, Australia, and many other countries.
The wooden part is made from a single piece of high-quality, dense beech plywood with brass inserts. Both sides can accommodate any of the four available brush types. A quick-release mechanism allows the head angle to be fixed easily and quickly.
This design has proven itself for over 10 years in more than a thousand gyms worldwide and has been refined to be simpler, stronger, and smarter than ever.

Features

- Sturdy design, suitable for intensive use in bouldering gyms
- Easy & quick angle adjustment for brushing holds in various positions
- Two brushes included: small and big brush for cleaning slopers, crimps, and pockets
- Flexible setup: both sides can hold any of four available brush types
- Premium boar hair brushes backed by extensive bristle research
- Replaceable brushes with affordable 20-packs available
- Double the lifespan of the big brush by mounting it in reverse once one side is worn out
- Discounts available for orders of 5 or more pieces

DE WOODSTOK

hangboard

SKU: DWS-07

Woodbord

Training hangboard from solid bamboo

deWoodstok's woodbord is a hangboard designed for climbers of all levels to increase or maintain finger strength. All holds are nicely rounded, ensuring comfort and reducing the risk of injury for your fingers. Made from certified bamboo, this innovative hangboard combines performance, aesthetic appeal, and sustainability.

Bamboo Benefits

- Performance: The fibers of bamboo provide exceptional high friction while being gentle on the skin, making it ideal for effective training.
- Aesthetic Appeal: The natural color and grain texture of bamboo enhance any home or training space.
- Sustainability: Bamboo is a renewable resource that grows rapidly—up to 1 meter per day! After harvesting, the plant continues to thrive, eliminating the need for deforestation. Additionally, bamboo absorbs more carbon dioxide than all types of wood. This makes it a great choice for climbers who care about the environment.

Features

- A large declining rim on top, perfect for warming up
- 4-finger pockets with depths of 13, 16, 20, 25, 30, and 35 mm
- 2-finger pockets with depths of 20 and 35 mm
- 4 stainless steel screws for wall mounting

Specifications

- SIZE: 590 x 148 x 40mm
- WEIGHT: 1900 grams
- MATERIAL: Bamboo & Stainless steel screws 5,0×90mm
